

COMPUTER ASSISTANCE

Important Tips

- Always unplug your computer from the wall when lightning is near by, not covered under warranty, but maybe covered by your insurance.
- Always have some sort of surge protection between your computer and the wall, power supplies not covered under warranty if blown by surge.
- Whenever you hear unusual noises or the noises stop, open your case and check that your computer fans are all working, if not you might damage your computer from parts overheating.
- If your internet is running slow, try setting Windows updates to notify only.
- Spybot Search & Destroy is a good program for removing the bad things that get into your computer, do the manual updates before using it and have it fix/remove all found.
- Always make sure you have your antivirus software updated, there's Lots of free antivirus programs.
- Having MS IE browser troubles? Try Mozilla Firefox it can be quicker and may work better. Get it from www.mozilla.org ...
- If your ADSL is not working, try unplugging the unit's power and plug back in, this resets it.
- If you cannot read some CD/DVD discs in your computer, make sure the disk is free of scratches and clean, if still does not work, in most cases it is the CD/DVD Drive itself that is faulty.
- Aysemart repairs quoted over night may not include restoring reinstalling all old programs and from backed up files.

Trivia: Ayse is pronounced Ace.
